To whom it might concern,

This is to confirm the role of Melania Geymonat Ramirez in two quality improvement projects and one audit for the Neurosurgery Department at Aberdeen Royal Infirmary. Those were:

- QI: Medicine reconciliation documentation
- QI: Documentation of long-term anticoagulant / antiplatelet guidance for patients in discharge summary
- Audit: Venous thromboembolism prophylaxis assessment & prescribing

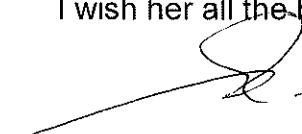

The first cycle was held on 15.01.24 – 28.01.24.

The second cycle was held on 26.06.24 – 7.07.24.

Her role was leading the group of four junior doctors in order to complete the three projects, along with data gathering, data analysis, presentation of results before the neurosurgery department, designing and implementing interventions, completing a second cycle and presenting a report with the conclusions and recommendations.

During this projects she demonstrated a clear understanding of the principles of a Quality Improvement project and Audit, proactivity and initiative.

I wish her all the best in her future endeavors.
